Mechel's Takeout: New Website Plan

421 NY-59, Monsey, NY · November 2026

Built as a favor

What we're building

- **Our own ordering website** for pickup and delivery, in Mechel's maroon and black. No commission on orders.
- **Cheapest delivery, picked automatically.** Every delivery order gets a price from both Uber Direct and DoorDash Drive and books the cheaper driver. If one has no drivers, it uses the other.
- **AI phone line** that takes orders 24/7, knows regulars by name, takes Shabbos pre-orders, and hands off to staff when needed.
- **HubSpot connection.** Every customer and order is saved automatically, which powers rewards, "your usual" reorders, and Shabbos and Yom Tov reminders.
- **Closes itself for Shabbos and Yom Tov**, using candle-lighting times.

How it connects to the point of sale (POS)

- Website and phone orders go **straight into the POS** and print in the kitchen like any other order. No retyping.
- The menu and prices come **from the POS**, so a price change there updates the website too.
- Toast, Square and Clover all allow this. If his POS doesn't, orders go to a tablet and kitchen printer instead.

What we need from him

- **Which POS he uses**, and a staff login for us
- **Menu, prices and photos** (or a POS export)
- **Hours**, including Friday and Yom Tov
- **Logo** and **kashrus certificate**
- **The phone number** the AI should answer
- An **Uber Direct** business account
- A **DoorDash Drive** business account
- Access to his **HubSpot**
- A **web address** (for example mechelstakeout.com)
- How he takes **card payments** today

He signs up for each account in his own name, so he owns everything, not us.

What it costs

OUR BUILD
$0
Done as a favor

OTHER QUOTE
$5,000
Build only

RUNNING COST (HE PAYS THIS EITHER WAY)	ESTIMATE
Website hosting and server	$0–$25 / month
Web address	about $20 / year
AI phone line (depends on how many calls)	$50–$200 / month
Text messages ("your order is ready")	1–2¢ each
HubSpot	Free plan to start
Card processing	about 3% per order
Delivery driver (usually charged to the customer)	$7–$11 per delivery
Fixed monthly total	**about $50–$225 / month**

Compare: Uber Eats and DoorDash apps take 15–30% of every delivery order. These are estimates; exact prices depend on his accounts and call volume.

Timeline: about 4 weeks once we have everything

Week 1
Menu, design, web address

Week 2
Ordering, payments, POS

Week 3
Delivery and HubSpot

Week 4
AI phone line, testing, launch
